Professional Summary

Full-Stack Developer with strong expertise in React.js, Next.js, TypeScript, HTML5, CSS3, and JavaScript. Developed responsive web applications and collaborated across UI/UX, backend, and CI/CD pipelines. Passionate about user experience and modern web development and building products people love.

Education

Dr. Akhilesh Das Gupta Institute of Professional Studies

Aug '23- Feb'27

Bachelor of Technology in Computer Engineering, CGPA - 8.02

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python

Tools: Git/GitHub, Discord.js

Frontend: React.js, Tailwind CSS, AG Grid

Backend: Node.js, Express.js, REST APIs

Data: MongoDB v6.0, MySQL 8.0, PostgreSQL

Development: Authentication, SDLC, Agile

Projects

MockMate: AI-Powered Interview Practice Platform | [Visit](#) | [GitHub](#)

Apr '26-Present

(Tech Stack: React, Node.js, Express.js, Google Gemini API, Tailwind CSS, Vite)

- Built a full-stack web app that generates personalized interview questions using an AI-powered resume parser, helping users practice interviews with real-time feedback and performance tracking.
- Engineered intelligent feedback system and analytics dashboard to track user progress and improvement over time.
- Deployed responsive web interface with Tailwind CSS and Vite, optimizing load times and user experience across devices.
- Developed a complete interview history dashboard with analytics dashboard displaying practice statistics, recent interviews, and performance trends to track user progress over time

CodeMentor AI: Ultimate Programming Sidekick | [Visit](#) | [GitHub](#)

Aug '25 - Sep '25

(Tech Stack: Node.js, Express.js, Discord.js, Google Gemini API, EJS, Bootstrap, Railway)

- Developed and deployed a full-stack AI Discord bot for multi-platform contest tracking, smart notifications, saving users 20+ minutes daily and increasing contest participation by 40%.
- Generative AI study plans and skill-level contest recommendations by Google Gemini API.
- Connected to a responsive web dashboard displaying bot stats and contests from 4 platforms.

Electronic Health Record Integration Platform | [Visit](#) | [GitHub](#)

Sep '25

(Tech Stack: Next.js, TypeScript, MongoDB, Tailwind CSS, REST APIs, Mongoose, Vercel)

- Designed and built a full-stack EHR dashboard enabling clinics to efficiently manage patients, appointments, and clinical records from a single interface.
- Built robust REST APIs, rigorous unit and integration testing, with complete CRUD for patients, appointments, and notes, leveraging file-based routing and TypeScript for end-to-end type safety.
